 Buzzy®

C-Root Rotary Ni-Ti Files

Excellent for Curved Canal Shaping

“Balanced rigidity and flexibility, excellent navigation in curved root canals.”

Disruptive Heat Treatment

Elevated martensite transition point (40°C) for greater flexibility and control.

Controlled Memory Wire

Adapts to canal anatomy, reducing ledges, transportation, and perforations.

Superior Fatigue Resistance

Heat-treated CM wire offers excellent torsional and flexion durability.

Pre-Curving Capability

Easily pre-curved to navigate even the most challenging canals.
